

CONform™

Flexible Concrete Forming Solutions

Changing the Way Concrete Is Formed

What Is CONform?

CONform is a reusable, flexible concrete form that can be used in place of conventional forms. CONform is made from polyolefins, a type of flexible plastic that gives you the ability to create bends and curves in a fraction of the time it takes using wooden forms. Its durability will allow for 100 installations from a single roll, without the use of any form release agent, saving you time and money. Once the concrete is set, the 50-foot form strips away clean and can be recoiled for easy storage.

Why CONform?

Cost (labor) saving

- ✓ Quick setup
- ✓ Easy cleanup with no form release agents required
- ✓ Quick removal and easy storage

Ability to reuse multiple times

- ✓ Lower per-use costs
- ✓ Lower refuse costs. No damaged forms.

Clean lines eliminate rework

- ✓ No sticking
- ✓ No feathering
- ✓ Less blowout

Environmentally friendly

- ✓ Manufactured from recycled plastic
- ✓ Recyclable (if ever necessary)

Being on the right path with **CONform** saves you:

- ✓ Labor Costs
- ✓ Material Costs

- ✓ Clean-Up Costs
- ✓ Installation Costs

Made from **98% Recycled Plastic Materials**
